JUNIOR BOOTO WABA

JUNIOR DATA SCIENTIST | CAREER TRANSITION

Bogotá, Colombia | +57 311 428 6372 | juniorbooto@gmail.com

GitHub | Portfolio | LinkedIn

Professional Profile

French language teacher transitioning into data science, with hands-on Python, SQL, statistics and machine learning practice through documented personal projects. Experience preparing data, comparing models and analysing errors, with a focus on reproducible workflows. Seeking a first junior role in data science or data analysis.

Applied Technical Skills

Programming: Python, pandas, NumPy, scikit-learn, Matplotlib.
Data and SQL: SQLite, joins, CTEs, window functions, quality checks and pipelines.
Modelling: classification, regression and anomalies; time-based or group-based validation.
Evaluation and delivery: MAE, ROC-AUC, precision/recall, tests, documentation and GitHub.

Professional Experience and Transferable Skills

French as a Foreign Language Teacher

Colegio Nueva York — Grupo Interasesores · Bogotá · Jun 2026–Present

- Design differentiated learning resources, define success criteria and communicate assessment results to learners.
- Contribute to collaborative planning and explain concepts to audiences with different proficiency levels.

French as a Foreign Language Teacher

Gimnasio Campestre La Fontana · Villavicencio · May 2022–Nov 2025

- Structure learning projects, assess progress and adapt materials to learner needs; integrate digital tools into teaching.

Earlier Teaching Experience

French for Specific Purposes — Collège Don Bosco, Kinshasa, 2019–2022. French as a Second Language — CS Père Nestor, Kinshasa, 2012–2015.

Education

Bachelor’s degree in Literature and Humanities — University of Kinshasa, DR Congo.

Languages

French: native. English and Spanish: intermediate.

Selected Personal Projects

Learning projects developed with documented AI assistance. Results below are drawn from repository reports; these projects are separate from paid employment in data science.

AfriFlow Explain | Transfer Paths and Anomaly Detection

- Analysed 11,775 synthetic transfers across 1,800 cases; extracted cycles, temporal chains and transaction-linked patterns, with an interactive interface.
- Compared two Isolation Forest models at a fixed budget of 36 alerts on 360 test cases: detected 19 injected scenarios versus 3 without path features, with 17 false positives. Synthetic prototype; no live bank connection.

GitHub project: afriflow-explain

BikeDemand | Hourly Bike Rental Forecasting

- Prepared 17,379 UCI observations; compared Ridge regression and boosting using chronological splits. Used calendar features available one day ahead, avoiding leakage from future weather observations.
- Test MAE of 72.35 rentals/hour versus a baseline of 79.79, a 9.3% reduction. Exported and reloaded the model; historical data from 2011–2012.

GitHub project: bike-demand

Credit Default | Binary Classification

- Applied logistic regression to 30,000 UCI records; split by customer profiles, fitted preprocessing on training data and selected the decision threshold on validation data.
- Test ROC-AUC of 0.745 and Average Precision of 0.501; analysed false positives and probability calibration. Historical Taiwan data from 2005; no individual lending decisions.

GitHub project: credit-default-classification

AdventureWorks | SQL and Data Preparation

- Imported nine Microsoft sample business tables into SQLite: 31,465 orders and 121,317 order lines. Used joins, views, CTEs and window functions.
- Executed 14 analyses and 3 additional queries; checked data granularity, keys and reconciled totals. Fictional sample database with a documented SQLite adaptation.

GitHub project: adventureworks-sql

Certifications and Badges: Python, Data and Security

Cybersecurity Essentials: From Risk to Resilience — Institut Mines-Télécom · FUN course badge · 9 Jul 2026 | Credential

Statistics for Engineers — Institut Mines-Télécom · FUN course badge · 15 Jun 2026 | Credential

Machine learning in Python with scikit-learn — Inria · FUN course badge · 11 Mar 2026 | Credential

Big Data Fundamentals — Institut Mines-Télécom · FUN course badge · 11 Mar 2026 | Credential

Python: Fundamentals to Advanced Concepts — Université Côte d'Azur and Inria · FUN course badge · 5 Mar 2026 | Credential

Machine Learning with Artificial Intelligence — Alison · certificate · 26 Feb 2025 | Credential

Data Science Masterclass for Beginners — Alison · certificate · 22 Feb 2025 | Credential

Logic, Reasoning and Resolution Refutation — Alison · certificate · 10 Feb 2025 | Credential

Leveraging AI in Predictive Analytics, Automation, and Data Management — Alison · certificate · 9 Feb 2025 | Credential

Data Science - Working with Data — Alison · certificate · 8 Feb 2025 | Credential

Python for Data Science From the Basics to Advanced — Alison · certificate · 2 Feb 2025 | Credential

Diploma in MySQL and Statistics for Data Analysis — Alison · online course diploma · 27 Jan 2025 | Credential

Data Entry Tools and Techniques — Alison · certificate · 22 Jan 2025 | Credential

Prompt Engineering for AI Applications — Alison · certificate · 21 Jan 2025 | Credential

Learn to Code with Python — Université libre de Bruxelles · FUN course badge · 29 Nov 2024 | Credential

Additional SoloLearn Training

Python Developer (4 Mar 2024); Python Intermediate (24 Mar 2024); Coding for Data (9 Mar 2024); Coding Foundations (27 Mar 2024).

Introduction to SQL (19 Mar 2024); SQL Intermediate (20 Mar 2024); Data Analytics with AI and Generative AI in Practice (14 Jul 2024); Visualize Your Data (Mar 2025).
