JUNIOR BOOTO WABA

JUNIOR DATA SCIENTIST | CAREER TRANSITION

Bogotá, Colombia | +57 311 428 6372 | juniorbooto@gmail.com

GitHub | Portfolio | LinkedIn

Professional Profile

French language teacher transitioning into data science. I have developed practical skills in Python, SQL, statistics and machine learning through documented personal projects. I have prepared datasets, compared models and analysed errors. I am seeking a first junior role in data science or data analytics.

Applied Technical Skills

Programming: Python, pandas, NumPy, scikit-learn and Matplotlib.
Data and SQL: SQLite, queries, joins, CTEs, window functions, quality checks and pipelines.
Modelling: regression, classification and anomaly detection; time-based and group-based validation.
Evaluation and communication: MAE, ROC-AUC, precision and recall, tests, documentation and GitHub.

Professional Experience and Transferable Skills

French as a Foreign Language Teacher

Colegio Nueva York — Grupo Interasesores · Bogotá · Jun 2026–Present

- Design differentiated learning resources, define success criteria and communicate assessment results to learners.
- Contribute to collaborative planning and adapt explanations for learners at different proficiency levels.

French as a Foreign Language Teacher

Gimnasio Campestre La Fontana · Villavicencio · May 2022–Nov 2025

- Designed learning projects, assessed progress and adapted materials to learner needs while integrating digital tools into teaching.

Earlier Teaching Experience

French for Specific Purposes — Collège Don Bosco, Kinshasa, 2019–2022. French as a Second Language — CS Père Nestor, Kinshasa, 2012–2015.

Education

Degree in Literature and Humanities — University of Kinshasa, Democratic Republic of the Congo.

Languages

French: native. English and Spanish: intermediate.

Selected Personal Projects

Personal projects completed as part of my data science training. Results are reported in the GitHub repositories, where the use of AI tools is documented. These projects are not paid data science work experience.

AfriFlow Explain | Transfer flow analysis and anomaly detection

- Analysed 11,775 synthetic transfers across 1,800 cases; extracted cycles, temporal sequences and transaction-linked patterns.
- At a fixed budget of 36 alerts across 360 test cases, the model with path features detected 19 injected scenarios, compared with 3 without those features, and produced 17 false positives. Synthetic prototype; no live bank connection.

GitHub project: afriflow-explain

BikeDemand | Hourly bike demand forecasting

- Prepared 17,379 UCI observations and compared Ridge regression with boosting using chronological splits. Used calendar features available one day ahead and excluded future weather data.
- Test MAE: 72.35 rentals per hour versus 79.79 for the baseline, a 9.3% reduction. Exported and reloaded the model; historical data from 2011–2012.

GitHub project: bike-demand

Credit Default | Binary classification

- Applied logistic regression to 30,000 UCI observations. Used a profile-based split, fitted preprocessing on training data and selected the decision threshold on validation data to limit leakage.
- Test ROC-AUC: 0.745; Average Precision: 0.501. Analysed false positives and probability calibration. Historical Taiwan data (2005); no individual credit decisions.

GitHub project: credit-default-classification

AdventureWorks | SQL analysis and data preparation

- Imported nine Microsoft sample tables into SQLite: 31,465 orders and 121,317 order lines. Used joins, views, CTEs and window functions.
- Completed 14 analyses and 3 additional queries; checked data granularity, keys and total reconciliation. Fictional sample database; SQLite adaptation documented.

GitHub project: adventureworks-sql

Selected certifications in data science, Python and AI

- **Statistics for Engineers** — Institut Mines-Télécom · FUN course badge · 15 Jun 2026 | Credential
- **Machine learning in Python with scikit-learn** — Inria · FUN course badge · 11 Mar 2026 | Credential
- **Big Data Fundamentals** — Institut Mines-Télécom · FUN course badge · 11 Mar 2026 | Credential
- **Python: Fundamentals to Advanced Concepts** — Université Côte d'Azur and Inria · FUN course badge · 5 Mar 2026 | Credential
- **Machine Learning with Artificial Intelligence** — Alison · certificate · 26 Feb 2025 | Credential
- **Data Science Masterclass for Beginners** — Alison · certificate · 22 Feb 2025 | Credential
- **Diploma in MySQL and Statistics for Data Analysis** — Alison · online course diploma · 27 Jan 2025 | Credential
- **Learn to Code with Python** — Université libre de Bruxelles · FUN course badge · 29 Nov 2024 | Credential

SoloLearn | Machine learning and responsible AI

- Bias Detection and Mitigation in AI Systems — 19 Oct 2026
- Machine Learning for Beginners — 19 Oct 2026
- Meet Claude — SoloLearn · course certificate · 19 Oct 2026
- Growth Mindset in the Age of AI — SoloLearn · course certificate · 19 Oct 2026
- AI-Powered A/B Testing — SoloLearn · course certificate · 19 Oct 2026

Great Learning | Data science and statistics

- Statistical Methods for Decision Making — Jan 2025
- Introduction to Data Science — Jan 2025
- Data Interpretation — Jan 2025
- Probability for Data Science — online course
- Data preprocessing — Dec 2024
